

## REMARKS

In the office action of December 28, 2006, claims 1-5, 7 and 8 were rejected under 35 USC § 102(b) as being anticipated by Kisor et al. (European Patent No. 0,683,599-A1) ("Kisor et al.").

The rejection of claims 1-5, 7 and 8 is respectfully traversed since the office action has not demonstrated that Kisor et al. teaches or suggests each and every limitation of these claims.

For example, the office action contends that certain patterns in Kisor et al. correspond to the recited reference tile. However, the office action fails to explain how Kisor et al. supposedly teaches the relevant claim limitations such as the limitation that the reference tile comprises a half-toned binary pattern that would be produced by the predetermined half-toning procedure for such N-pixel tile if the portion of a pre-half-toned data that resulted in such N-pixel tile were of uniform lightness.

As another example, the office action contends that in order for Kisor et al. to select the correct pixel pattern from the pattern sets, some sort of comparison or test between the number of black pixels in the pixel pattern and block pixel count file is inherently performed. However, the office action fails to explain how Kisor et al. supposedly teaches the relevant claim limitations such as the limitation that an N-pixel tile is compared with a corresponding N-pixel reference tile that comprises a half-toned binary pattern that would be produced by the predetermined half-toning procedure for such N-pixel tile if the portion of a pre-half-toned data that resulted in such N-pixel tile were of uniform lightness.
